Notes:  
Units are in parts per billion.  
R - Compound was found in the blank and sample.  
F - Result exceeded calibration range.  
F1 - MS and/or MSD Recovery exceeds the control limits.  
F2 - MS/MSD RPD exceeds control limits.  
H - Sample was prepared or analyzed beyond the specific holding time.  
J - Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.  
JN - The analysis indicated the presence of a compound that has been tentatively identified (N) and the associated numerical value represents its approximate (J) concentration.  
U - Indicates the analyte was analyzed for but not detected.  
UJ - The analyte was not detected above the reported sample quantitation limit. Data are flagged (UJ) when a GC analysis took outside the primary acceptance limits. The qualified UJ data are not excluded from further review or consideration. However, only one flag is applied to a sample result, even though several associated GC analyses may fail. The UJ data may be viewed as:  
X - Sample is outside control limits.  
\* LCS or LCSd exceeds the control limit.
